

Reference

With this reference, we would like to express our gratitude and highest appreciation for the work of the entire team of Stenik Group Ltd., also referred to simply and friendly as Stenik.

Be Fit Ltd. owns a chain of drugstores in Sofia and has been conducting online sales since 2012. In 2018, the rapid pace of development of eCommerce technologies led us to the need to update our online platform. After a long journey of consultations and unsuccessful attempts in the market for specialists in eCommerce technologies, we chose Stenik and their team of professionals.

A choice we would make again, every single day and under all circumstances. Initially, we chose Stenik because of their professional communication, excellent knowledge of the products and technologies they offer, understanding of our needs and requirements, and readiness to develop a product tailored to our individual requirements. Subsequently, Stenik confirmed our initial positive impressions with ease of work, structured communication, guidance, and involvement in the project. The feeling when realizing the new online store www.befit.bg was like building a new website with friends and business partners, filled with enthusiasm, ideas, and solutions. Stenik successfully and masterfully implemented all our requirements - a latest generation Magento v.2 platform, ERP integration with commercial software, migration of products, users, and orders from our old platform, as well as many different enhancements that fulfill and emphasize our concept of a personalized experience for our online users.

We would recommend Stenik to all our friends and partners! The Stenik team possesses the rare quality of delivering more than promised. In the realization of our new online store, they not only performed the difficult task of meeting our high requirements but also supplemented this with numerous suggestions for improvements and a feeling of flawless user behavior when shopping.
