

## REFERENCE

### **bultech-bg.com**

Our partnership with Stenik began when it became impossible to further develop our old online store. It was extremely important for us to find a company that offers a stable, secure product with no limitations on future modifications. At that point, we received a recommendation for Stenik from the owner of our ERP system, which was a clear sign that the two systems would be able to work together seamlessly.

We are extremely happy with the way our new online store bultech-bg.com turned out and that we chose Stenik for its development.

Throughout the entire process of creating the online store, we received many ideas from the Stenik team, starting from the design and reaching key functionalities. This greatly helped our store to be on par with the stores of large international companies in our industry, which are many times bigger than us in terms of turnover, staff, and have a history of at least 50 years.

Our online store operates with more than 50,000 items, and all information about the items and clients is synchronized from the ERP system. This makes our work significantly easier, as we input information only in one place. Despite the complexity and volume of the data, the synchronizations work and update daily without issues.

We confidently recommend Stenik as a reliable and trustworthy partner for developing a good, secure, and scalable online store. We believe we will have a long-lasting and fruitful partnership with Stenik Group Ltd.
