

Reference

issued by Kontrax AD

With this reference, we would like to express our satisfaction with the joint work with the team of "Stenik Group" Ltd., who built the new corporate website of "Kontrax" AD.

As a system integrator and software developer, "Kontrax" has rich experience as a contractor of similar projects and we know the difficulties in communication with the client, preparing and accepting the technical assignment, approving the different stages of the project and the inevitable additions, which are always part of complex projects related to software development. Despite our demanding nature, "Stenik" superbly handled all challenges and met our requirements.

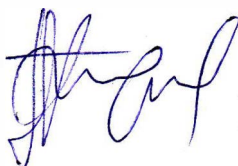

The project was managed appropriately by "Stenik" in all its phases and this was the basis on which we built professional partnership relations.

The feedback, both from "Kontrax" employees and from clients and partners for the new website, is positive and we eagerly await to follow how the new website will be indexed and ranked by search engines. We would gladly continue our joint work with "Stenik" regarding maintenance, SEO, as well as new projects.
