

# Pirin Hill

## Reference

from Pirin Hill Socks Ltd.

After extensive research into different options for the migration of our online store, our choice for a new platform and partner fell on **Magento** and **Stenik**. Three years later, we are satisfied with this choice and continue our good collaboration with them.

What initially impressed us was the thorough research by **Dimitar Dimitrov** regarding our way of working and future projects, so that both parties could be sure that a potential partnership would be suitable in the long term. After the work began, we spent significant time with **Stefan Chorbanov** refining the design of our store, during which we were impressed by his flexibility and his desire to achieve the best possible result for us. To this day, we continue to maintain regular contact with Stefan and Dimitar, which is always a good sign for a partnership.

In addition to the positive impression from working with the owners of **Stenik**, we are extremely satisfied with the communication and responsiveness of the other team members – project manager, financial manager, support department.

The competence of a company's employees is extremely important for day-to-day operations and in the development of new projects, and in this regard, **Stenik** is exceptionally well-prepared.

We can always rely on the experience and recommendations of **Stenik** as a reliable and correct partner, which is extremely important in such a key aspect for the development of any online business as the online store.

**Dimitar Yorgov**
