

REFERENCE

Our partnership began at a moment when we realized that we could no longer continue to grow with the old platform with which we had started our online business. We decided that we needed something stable, something secure, something that would be a solid foundation on which to build our business. And here came a recommendation from a friend for the software company Stenik and their supported platform Magento II. The migration was successful because Stenik listened to our needs and offered us a working solution.

We feel confident that our online store, which now offers more than 10,000 unique products, will continue to operate stably even under peak loads. Above all, I would like to highlight the additional functionalities they implemented, which definitely paid off over time:

- Bundle (promo) packages;
- Integration with eMag.bg;
- Synchronization with our strategic partners (suppliers and clients).

We feel comfortable being part of the community that Stenik is developing, and we are confident that with their help, we will continue to offer our online customers a good user experience that brings added value to our business.

Without any hesitation, we recommend Stenik as a competent partner with excellent expertise and timely solutions.
